DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 8-11 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Nisser, US Patent No. 3330,723.

Nisser teaches a process and apparatus for the production of fibrous webs, in which a forming fabric **9** in figure 2, is passed through a pressurized chamber **1** fluidly connected to a source of pressurized fluid **23**, and a fibrous slurry **4** is deposited across the entire width of the fabric, see also column 3, line 71 through column 4, line 68. Note also the use a roller **21** that is part of the chamber, i.e., the slurry is deposited on the fabric at a point where roll **21** is carrying the fabric/belt **9**. Nisser teaches in column 4, lines 24-28, that the headbox can be pressurized by connecting conduit **23** to a source of compressed air.

Allowable Subject Matter

3. Claims 20-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1731

4. The following is a statement of reasons for the indication of allowable subject matter: Nisser fails to teach or suggest the rollers configuration of claims 20-21, i.e., the rolls nips of claim 20 nor the second pressurized chamber defined by a plurality of rolls and a second chamber housing of claim 21.

Response to Arguments

5. Applicant's arguments with respect to claims 8-11 and 19 have been considered but are moot in view of the new ground(s) of rejection.
